SIT313 Secure Frontend Applications — P2 Report

Welcome Email

Name: Lav
Unit: SIT313 – Secure Frontend Applications
Task: P2 – Welcome Email
Student ID: *[2510999052]*

1. Introduction

The purpose of this task was to extend my DEV@Deakin web platform by adding a newsletter subscription feature.

The feature allows a user to enter their email address and click the **Subscribe** button. The frontend then sends the email address to an ExpressJS backend.

2. DEV@Deakin Platform

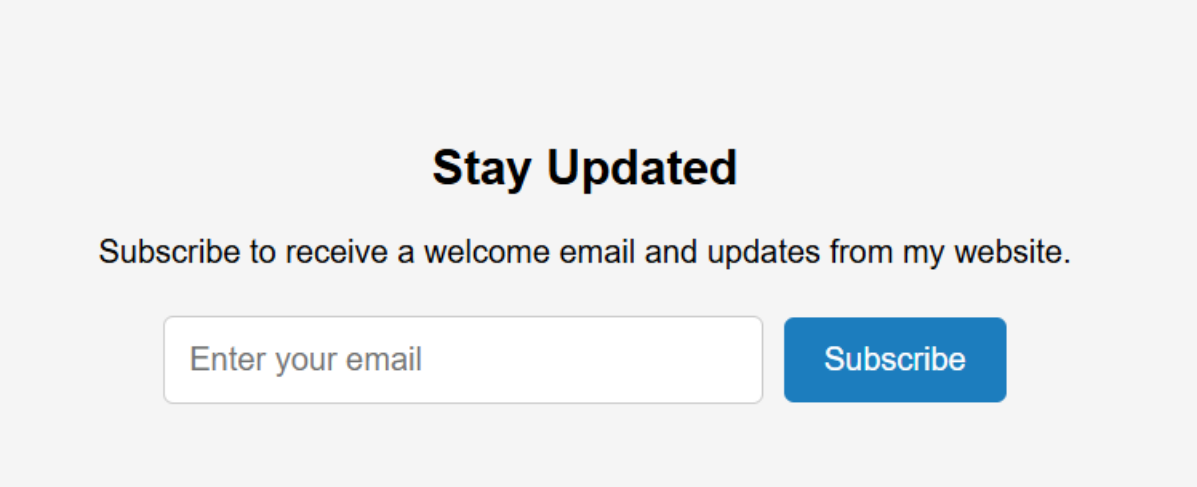

I extended my existing DEV@Deakin website by adding a Subscribe section.

The section contains:

- An email input field
- A Subscribe button
- A message area to display the result
- JavaScript to send the email address to the backend

Screenshot of DEV@Deakin Platform

Figure 1:

3. Testing

I tested the subscription feature by entering an email address into the Subscribe form and submitting it.

Screenshot of Terminal

Figure 2:

```
PS D:\SIT 313 Fullstack\HTML\SIT313 P2\backend> node server.js
Server running on http://localhost:3000
Subscriber email: lavsukhija001@gmail.com
Subscription received!
```

This task allowed me to extend my DEV@Deakin platform with a newsletter subscription system.
